Deliver Smarter.**

MONITOR FLOW. REPLACE SMARTER.

The Challenges

- Filters changed too early or too late
- Poor machine performance & downtime
- Increased service calls & costs
- No visibility of water usage

The Bottlesense Flow Solution

- Know exactly when to change filters
- Protect equipment & water quality
- Reduce service calls & costs
- Real time visibility 24/7/365

Bottlesense Flow is a smart wireless flow monitor for coffee machines and POU (Point Of Use) water dispensers that measures water usage in real time to help you replace filters at the right time, improving performance, protecting your customers equipment and helping to increase sales & customer satisfaction.

Change Filters Smarter
Monitor water usage to replace filters based on consumption.

Protect Equipment
Prevent scale build-up and blockages to keep machines running.

Data Driven Decisions
Identify trends, uncover opportunities and grow with actionable data.

Boost Sales & Profits
Replace filters on time to boost sales and cut costs.
